iTester and Assistive Technology

Background

iTester provides a rich suite of accessibility and accommodations features within the Student Testing Interface to assist students with special needs. Several external third-party accessibility hardware solutions and Microsoft Windows-based accessibility applications are also compatible with iTester.

iTester is developed in compliance with the World Wide Web Consortium's (W3C) Web Content Accessibility Guidelines (WCAG) 2.0, Level AA for optimal compatibility with assistive technology products and features. As part of this effort, eMetric utilizes the W3C's Accessible Rich Internet Application (ARIA) recommendation to improve the interaction between assistive technology and the testing platform. Any assistive technology products should comply with the User Agent Accessibility Guidelines (UAAG) and support the ARIA recommendation for the best user experience.

Interim and Formative Testing Using a Web Browser

The Student Test Interface can be accessed via a web browser when administering interim and formative tests. When accessing a test using the web browser, third party accessibility hardware and applications can be used as they would normally be used with any other application. Test coordinators should have students take a practice test with their required external third-party accessibility hardware or software to ensure the student is comfortable using them with the Student Test Interface and test content.

Summative, Interim and Formative Testing Using a Kiosk

The Student Test Interface must be accessed using the iTester Kiosk application when administering Summative assessments. The kiosk is optional for interim and formative applications. The kiosk ensures a more secure testing environment but may interfere with external third-party accessibility applications. To facilitate the use of external third-party accessibility applications *on Windows operating systems*, iTester includes the "Allow Accessibility Mode" (AAM) accommodation. AAM is activated in the New Mexico Public Education Department Assessments Portal on the student accommodations tab (where all other student accommodations and accessibility supports are set). AAM is only available for students whose test device is running a Windows operating system. Test coordinators should ensure the "Allow Accessibility Mode" (AAM) accommodation is turned on for all students who will require Windows-based third-party accessibility software. Owing to iTester's secure kiosk feature and variability among assistive technologies, some assistive technology software may not be compatible with iTester, even with the "Allow Accessibility Mode Testing" accommodation activated. Also note that some assistive software, including commonly used screen readers, do not require AAM to be used within the kiosk.

Test Coordinator Responsibilities

Prior to operational testing, test coordinators should have the student use a Kiosk to log into a Formative item set to:

1. Ensure the student's assistive technology will work with iTester.
2. Determine if the AAM accommodation must be activated to use the assistive technology.
3. Provide the student an opportunity to practice using the assistive technology with the iTester Kiosk. The student can use an appropriate Formative assessment (math, language arts, science) with the kiosk and the 3rd party assistive technology to gauge compatibility between the kiosk and 3rd party assistive technology with and without AAM enabled.

If the preferred third-party assistive technology does not work well with the iTester Kiosk Allow Accessibility Mode on, then consider using the third-party software on an external stand-alone device and transcribing the student's answers into iTester in accordance with PED's transcription policy.

Some test content, such as Technology Enhanced Items, may not be fully WCAG compatible. Depending upon the test content provider and your state's accessibility and accommodations policy, an alternate form or paper test may be required.

Using Screen Reader Software

Screen readers may be used with the iTester Kiosk. eMetric tests screen reader compatibility using JAWS2021®. JAWS2021 does not require AAM to be activated to be used within the iTester Kiosk. Screen readers should not be used on the Assessment of Science Readiness assessment.

Using Predictive Text Software

eMetric provides CoWriter® word prediction in English or Spanish via the *Word Prediction (embedded)* accommodation option. Students with this accommodation will have access to CoWriter word prediction application in any open-ended items; this does *not* require a current CoWriter account. When a student selects "Español" as their Kiosk language localization option on the Kiosk log-in screen, they will receive predicted words in Spanish when they use the word prediction tool, If the Kiosk language localization option is left on "English", they will receive predicted words in English. This accommodation is only available to Windows, Apple MacOS, and Chromebook users, it is not supported in Apple iOS. This accommodation requires extra files to be downloaded to the student's workstation when they log into their test, therefore we recommend having students with this accommodation log in a few minutes before or after other students in the test group to minimize the download time. As an alternative, you may use third-party predictive text software on an external stand-alone device and transcribe the student's answers into iTester in accordance with PED's transcription policy.

Using Speech-to-Text (STT) Software

Many commonly used Windows-based STT programs (for example: Windows dictation, Dragon NaturallySpeaking™) can be used with iTester without AAM activated, provided the software is running prior to launching the Kiosk. Texthelp™ Read and Write can be used with AAM

activated. STT programs can be used for basic dictation but editing commands (voice commands used to select and edit text that was previously dictated) will not work. If the student closes the STT application during testing, the student must exit the kiosk, restart the STT program and then re-log into the Kiosk to continue testing with STT (shortcut keys cannot be used to launch the application while the kiosk is open).

Important Note: Allow Accessibility Mode reduces kiosk security controls to allow third-party software to operate in conjunction with the kiosk. If AAM is used, proctors should closely monitor students testing with this accommodation to ensure test security is not compromised.

Allow Accessibility Mode Testing

The accommodation is located on the Students page under the Accommodations tab in the iTester New Mexico Public Education Department Assessments Portal.

The screenshot shows the iTester portal interface. At the top, there is a navigation bar with links for Home, Site Readiness, Students, Enrollment Transfer, Classes, Test Sessions, Pre-ID Management, and Dashboard. A user profile for William Kinnison is visible on the right. Below the navigation bar, there is a breadcrumb trail: Student Information > Accommodations > Classes. The main content area is divided into three columns of accommodation options, each with a checkbox and a dropdown arrow. The first column, 'Accessibility Features', includes options like Reverse Contrast, Custom Masking, Color Contrast, Answer Masking, Mathematics TTS English, Mathematics TTS Spanish, Science TTS English, Science TTS Spanish, and Social Studies TTS English. The second column, 'Accessibility Options', includes Headphones/Noise Buffer. The third column, 'Accommodations', includes SLA TTS Spanish, ELA TTS English, and 'Allow Accessibility Mode Testing', which is highlighted with a red box. Other options in this column include ASL Video Mathematics, ASL Video ELA, Basic Calculator, Scientific Calculator, Word Prediction, Mathematics Tools, Word Prediction, Speech-to-Text, Human Signer, Human Signer for Test Directions, Braille Notetaker, Braille Writer, Refreshable Braille Display, Screen Readers, Tactile Graphics, Human Reader English, Human Reader Spanish, Read Aloud to Self, Human Scribe, Assistive Technology Device Presentation, and Assistive Technology Device Responses. The right side of the page shows 'Accommodations for English Learners(EL)' and 'Accommodations for English Learners(EL)' with options like Spanish Language Version, Picture Dictionary, Directions in Native Language, Commercial Word-To-Word Dictionary, Customized Dual Language Glossary, and Pocket Word-To-Word Translator.

Steps to Turn Accessibility Mode On

1. Open the 3rd party accessibility application on the testing device, and log-in if necessary.
2. Launch the iTester Kiosk. The accessibility application menu should be visible when the kiosk is launched.
3. Student enters their Username and Password to log into the iTester kiosk.
4. Student selects the session and enters the session access code.

Ensure the student has a row on the accommodations Options screen indicating that he/she received the Allow Accessibility Mode accommodation with an input for the proctor to enter the proctor password.

Note: The student will only see the option if they are running in a **kiosk mode on Windows**. If they are in a non-kiosk mode (i.e., browser) or other operating system kiosk, this accommodation is not available.

The screenshot displays the 'Options' menu with the following settings:

- Text-to-Speech:** Volume: 100, Speed: Normal (with Slow and Fast options).
- Zoom View (Magnifier):** 100%, 150%, 200%, 300%. A preview box shows the text: "The quick brown fox jumped over the lazy dog."
- Reverse Contrast:** Default (selected), Inverted.
- Color Contrast:** Default (selected), Classic, Ruby, Chalkboard, Nocturnal, Aquiline, Eccentric, Azure, Haunted, Celestial, Antique, Creamy.
- General Masking:** Enabled.

At the bottom, a red-bordered box highlights the 'Accessibility Mode' section, which includes a 'Proctor Password' input field and a green 'Submit' button. Below this box is a grey 'Continue' button.

5. The proctor will enter the proctor password.

Note: The proctor password is located on the Home page of the iTester Portal.

Information for District Test Coordina...

Welcome to the New Mexico Summative Assessments Administration portal. This site provides access to student information and test session details.

Based on device configurations at your facility, you or your IT coordinator need to download and install the appropriate student kiosk utilizing the links in the table below. Apps for iPads and Chromebooks will need to be downloaded from the appropriate app store.

Windows	Student Kiosk for Windows
Mac	Student Kiosk for Mac

If you need assistance utilizing this site, please contact Cognia support at nmtechsupport@cognia.org or by calling toll-free (877) 676-6722. Edit

Proctor password for Cyber City Sch1 (Cyber City) Change

DSZKBWVR

Site Readiness login for Cyber City Sch1 (Cyber City)

Username: WSR-EM-CS6
Password: M7V5R5VG

Note:

- The student will not be allowed to advance past the accommodations Options screen without the proctor entering the correct proctor password.
 - If the proctor password is blank or invalid, a message indicating this will be displayed.
6. After the proctor enters the proctor password, the accessibility mode is successfully enabled for the student. The student will be able to successfully utilize desired assistive technology software which displays windows or an interface on top of the kiosk.
 7. When the student submits the test session and returns to the profile screen, the accessibility mode will be disabled.
