

Guide to Installing the NMPED Student Kiosk and Conducting Site Readiness

2026 – 2027 NMPED Test Administrations
Updated July 16, 2026

Important Contact Information and Resources

For more information on working with the New Mexico Public Education Department Assessments Portal, see the Portal User Guide, which is available on the New Mexico Public Education Department Assessments Help & Support page: <https://newmexico.onlinehelp.cognia.org>

If you experience any difficulty downloading or installing the kiosk, contact Cognia Technical Support at nmtechsupport@cognia.org or (877) 676-6722.

For questions about the test administration or other technical information, contact the Cognia Client Care Center at nmtechsupport@cognia.org or 1 (877) 676-6722.

For questions or information regarding New Mexico Public Education Department Assessments policy and testing procedures, contact the New Mexico Public Education Department at ped.assessment@ped.nm.gov or (505) 827-5861

I. Introduction

The New Mexico Public Education Department Assessments online testing system is used to administer assessments and access student and summary reports for the New Mexico Measures of Student Success and Achievement (NM-MSSA) and Interim Measures of Student Success and Achievement assessments (iMSSA).

There are two components of the NMPED online testing:

- the **New Mexico Public Education Department Assessments Portal**, used by school and district administrators to perform all administrative tasks,
- the **Student Testing Interface**, used by students for testing.

Students are required to take *summative* assessments using the Kiosk application. Students may take practice and interim assessments using a web browser to access the Student Test Interface. This document contains instructions on installing the **New Mexico Public Education Department Assessments Kiosk** and conducting site readiness testing on devices used for online testing.

Note: The **Student Testing Interface** is a version of the iTester student testing application that has been tailored for the New Mexico Public Education Department Assessments. Some technical documentation may refer to the student testing interface as iTester.

For more information on working with the New Mexico Public Education Department Assessments Portal, see the *Portal User Guide*, which is available on the [New Mexico Public Education Department Assessments Help & Support page](#).

A. Technology Overview

The **Student Testing Interface** is used by students to take practice tests and assessments and is accessed by one of two methods:

1. Launching a web browser and navigating to the following URL:

Practice Tests: <https://nmpracticetest.cognia.org/student/>

Operational Tests: <https://newmexico.cognia.org/student>

2. Launching a student testing kiosk. (For practice tests, click on “Practice” link after launching kiosk.)

The **New Mexico Public Education Department Assessments Kiosk** refers to the software application used for secure online testing. The student testing kiosk restricts access to other computer applications during testing. Students **MUST** use a student testing kiosk to take the summative assessments (NM-MSSA). Interim assessments can be accessed using either a web-browser or student testing kiosk. Using a web-browser is the recommended method for interim testing.

The kiosk is a cross-platform, rich internet application that employs the industry’s highest standard in security, reliability, and usability for high-stakes assessment. The kiosk runs seamlessly on Windows® and Mac® operating systems, iPad® tablets; with and without external keyboards, and Chromebook™ notebook computers.

Information on Student test Interface tools, accommodations, accessibility features and navigation can be found in the NMPED Assessments Browser Testing User Guide and the NMPED Assessments Kiosk Users available on the [New Mexico Public Education Department Assessments Help & Support](#) page.

Information on using third party accessibility or accommodations software with the student test interface can be found in the Testing with Third Party Assistive Technology Guide available on the [New Mexico Public Education Department Assessments Help & Support](#) page.

B. Overview of Steps for Technology Coordinators

The testing environment for a school is installed and set up by an IT Coordinator (ITC). In situations where there is not a dedicated IT Coordinator, a School Test Coordinator (STC) or District Test Coordinator (DTC) can perform these tasks.

After your DTC or STC has set up your ITC account, you will receive your user account information via email. If you have not received your account information with your login credentials:

- **Public school:** Contact your DTC or STC.
- **Charter school:** Contact the Cognia Help Desk at nmtechsupport@cognia.org or (877) 676-6722.

To install and set up the kiosks for your school:

1. Review the [Technology Guidelines](#) to ensure that you have the correct equipment for student testing.
2. Configure your network to support student testing on the kiosk:
 - [Testing Environment Setup](#)
 - [Network Connectivity](#)
 - [Bandwidth](#)
 - [Thin-Client Environments](#)
 - [Monitor Settings](#)
 - [Spanish Language Support](#)
 - [Default Voice Settings for Text-to-Speech Accommodations](#)
3. Download and install the appropriate kiosk to each student testing device:
 - [Chromebook Application](#)
 - [iPad Application](#)
 - [macOS®](#)
 - [Windows®](#)
4. Complete the [Site Readiness Tests](#), which perform system checks and provide a testing simulation scenario for each device or device configuration.

To ensure that the testing environment is ready for students on time, we recommend that you run the Site Readiness tests directly after installing the test device kiosks.

5. When all the configurations to be used for student testing are ready, certify that your site is ready for student testing

Contact the Cognia Service Desk with any questions about the technology guidelines, downloading the New Mexico Public Education Department Assessments Kiosk, and the Site Readiness tool.

II. Technology Setup

A. Network Connectivity

All student testing devices used for student testing should have access to the internet and be able to access the server using HTTP/HTTPS protocols on ports 80 and 443. Whitelist the following sites on ports 80 and 443 in content filtering proxies or other locally used proxy software.

- <https://newmexico.cognia.org>
- <https://nmpracticetest.cognia.org>
- <https://newmexico.cognia.org/student>
- <https://nmpracticetest.cognia.org/student/>
- fonts.googleapis.com/
- themes.googleusercontent.com/
- googleusercontent.com/
- <https://cognito-identity.us-west-2.amazonaws.com>
- <https://cognito-identity.us-east-1.amazonaws.com>
- <https://eventsapi.emetric.net/nmprod/router>
- app.getsentry.com
- dc.services.visualstudio.com
- Az416426.vo.msecnd.net

Note: It is critical that districts and buildings using web content filters perform site readiness testing to confirm the Student Interface Test content can be downloaded to student kiosk clients without any issue.

If you are working with sandboxing applications, complete one of the following steps while installing the kiosk:

- Choose network folder location for local caching.
- Make sure the default location, such as C:\Users\user\AppData\Local\emetric (%localappdata%\emetric) and its contents are not deleted by these applications.

Note: Student-testing data, including encrypted responses, will be saved to the indicated location only if the network connection or Internet connection is lost during the test. Students will be able to continue testing without interruption, but their testing data will be saved in the indicated folder.

A note about OneDrive:

OneDrive notifications may interfere with the kiosk and student test taking experience. If OneDrive attempts to steal the screen's focus during testing, the Kiosk will display a white screen. The student will then have to click anywhere on the white screen to regain focus in the kiosk, once clicked they will be able to resume testing where they left off. To prevent this, schools should use one of the following approaches:

- If OneDrive is not needed or used on student devices, schools are recommended to disable OneDrive during student testing.
- If OneDrive cannot be disabled, please take necessary steps to prevent any administrative actions, including file sharing or synchronization and administration updates to OneDrive settings, that would trigger a OneDrive notification during student testing.

B. Bandwidth

The ability of a school's network to support a given volume of on-line testers is a function of the available bandwidth between the student's test device and the data center serving the test content, the number of students who will be downloading tests, and size of the test content. The Site Readiness Test's Connection Capacity Test will measure the bandwidth between a student's test device and the data center and determine the number of tests that can be downloaded simultaneously. Use the results of this test to gauge the impact your bandwidth will have on testers.

- Schools with low internet bandwidth (i.e., an internet download speed of less than 1.5 Mbps or an internet upload speed of less than 256 Kbps) should stagger student start times by 1–2 minutes to reduce the likelihood of interruptions.

C. Thin-Client Environments

When using thin-client environments, such as Terminal Services, Citrix®, or LTSP®, make sure that there is enough memory, CPU, and bandwidth on the server to accommodate multiple student test sessions. The application requires a minimum of 80 MB of memory per client session and performance can vary depending on the size and type of the test. Allowing multiple sessions on an improperly sized thin-client environment will lead to poor performance.

Additionally, schools using thin-clients need to be cautious when there is 1 GB or less of physical memory on the student testing device. In this case, a local installation is strongly recommended. As a rule, if you can use Chrome™ browser to access web-based email or web-based streaming services on all student testing devices simultaneously, then testing should go well.

In thin-client environments, the accounts students use to log in to the student testing devices (not the NMPED Assessments login) must be unique for each student. Also, each account must have its own dedicated user profile.

For assistance, contact Cognia Technical Support at nmtechsupport@cognia.org or (877) 6766722

D. Monitor Settings

Ensure that all monitors used for testing are set to the default color settings. If a student requires a zoom accessibility feature, review the recommended screen resolutions in the table below:

Table 1. Monitor Settings

Required Zoom Level for Student	Recommended Screen Resolution
100% (No Zoom)	1024 x 768 (or Higher)
150%	1920 x 1080 (or Higher)
200%	1920 x 1080 (or Higher)
300%	1920 x 1080 (or Higher)

Note: These are only recommended screen resolutions. Use the screen resolution the student is most comfortable with. The student or proctor may set the zoom level within the Kiosk when the student logs in at the time of testing.

E. Spanish Language Support

The New Mexico Public Education Department Assessments online test administration is also available in Spanish.

The Spanish Text-to-Speech version of the test is not available on iPads, but is supported on the following systems:

- Windows®
- macOS®
- Chrome OS™

For instructions on localizing the testing machines for Spanish and adding accommodations for the students requiring a Spanish text-to-speech version of the test, see the *New Mexico Public Education Department Assessments Technical Guide for Spanish Language Support*, which is available on the [New Mexico Public Education Department Assessments Help & Support page](#).

F. Default Voice Settings for Text-to-Speech Accommodations

The voice used by the student testing kiosk for text-to-speech is the voice set as the default on the device the student is using for testing. Ensure that the desired voice is set at the default for the operating system installed on the device.

To update the default voice for Windows® 11:

1. Click the **Windows®** button.
2. Select **Settings**.
3. Click **Time & Language** in the left sidebar.
4. Click **Speech** in right-hand menu.
5. Choose your preferred voice under **Choose a voice**.

To update the default voice for macOS®:

1. Open **System Settings**.
2. Click **Accessibility**.
3. Select **Spoken Content**.
4. Choose your preferred voice from the **System voice** dropdown menu.

III. NMPED Kiosk Installation

A. ChromeOS Application Installation

Managed Chromebooks

These instructions are for technology coordinators who have access to the Chromebook device management console to administer and manage their Chromebook devices.

Step 1: Set up your school technology

Review section II: [Technology Setup](#) in detail.

Step 2: Install the New Mexico Public Education Department Assessments Web app for Chrome OS

1. As the Chromebook™ administrator, log in to your Chrome OS™ management console (<https://admin.google.com>).
2. Expand the **Devices** menu, and then **Chrome**.

3. Select **Apps & Extensions** and then **Kiosks** and select the **organizational unit** for which you want to install the New Mexico Public Education Department Assessments Web App and Extension for ChromeOS.

Note: Ensure that child organizational units inherit the app and policy settings from the parent OU. If inheritance is disabled, the kiosk app will not appear on the devices in those child OUs and the policy settings and app must be installed locally in the desired child OU.

4. Expand the yellow + in the bottom-right corner and select **Add by URL**:

5. Enter <https://newmexico.cognia.org/student/> and select **Save**.

Add by URL

Add by URL to install a progressive web app or create a shortcut to a website in Kiosk

URL

<https://newmexico.cognia.org/student/>

Note: this feature requires ChromeOS version 81 or later

CANCEL **SAVE**

6. Google will then prompt you to allow permissions to this app. Select **Agree**.

Note: Adding web apps in Kiosk

You have selected to add a web app in Kiosk. For web apps to work properly in Kiosk, all permissions will be granted without requesting end users' consent (for example, permissions to access the camera and microphone). Therefore, you should only add web apps that you fully trust. If you add a web app in Kiosk you understand that:

- Permissions will be automatically granted only when they are requested from the web app origin. Permission requests from a different origin will be automatically rejected. If this web app uses more than one URL origin, you can define additional origins under the Additional URL origins policy. All the origins defined in this policy will get permissions automatically granted.
- Permissions used by the web app may change over time. Any new permission will be automatically granted, provided they are requested from the web app origin.
- Permissions will be granted or rejected as mentioned above without notifying you or the end user.

In adding this web app you authorize and instruct Google to grant permissions as mentioned above.

CANCEL **AGREE**

7. The New Mexico Public Education Department Assessments Web App for ChromeOS appears in the app list.

App	Installation policy	Version pinning
<i>Auto-launch app</i>	None Locally applied ▼	▼
 New Mexico Public Education Dept Assessme... https://newmexico.cognia.org/student/	Installed	

8. Select the New Mexico Public Education Department Assessments app and scroll down the right-side bar to **Additional URL origins** field to add the following URL, exactly as shown <https://nmpracticetest.cognia.org/>.

Additional URL origins for this kiosk app

If this app uses more than one URL origin, enter the additional origins. All specified origins will get permissions automatically granted. Permissions will be rejected for any other origins not included in this list. [Learn more](#) 

Additional URL origins

nmpracticetest.cognia.org

One origin per line. Maximum characters allowed: 10000.

Locally applied ▼

9. Scroll down further on the right-side bar to the **Extension** section. Click **ADD EXTENSION** and from the pop-up list select **Add from Chrome Web Store**.

Extensions

Inherited from Google default

Add from Chrome Web Store

Add from a custom URL

ADD EXTENSION ▼

10. In the Chrome Web Store enter the iTester ChromeOS Carrier extension ID **kjahnholdenligmihnnjkencnbfdbpdd** in the **Search by ID** text box and then select the **Select** button to add the extension.

11. Once the extension has been added, you need to enable **Allow enterprise challenge**. Under Certificate management enable the **Allow enterprise challenge** setting by moving the slider to the right. When it is enabled, it will show as green.

Important Note: Verify in Kiosk Settings that “Allow App to manage power” is **disabled**. To do this, click on **Devices, Apps & Extensions** and then select **Kiosks**. Click on the **New Mexico Public Education Department Assessments** app name and check to make sure the setting **Allow app to manage power** is **disabled** (slider is moved to the left and not green).

Step 3: Configure Device Settings

1. Navigate to **Devices**, then select **Chrome**.

2. Click on **Settings** and then choose the relevant **Organizational Unit** where the New Mexico Public Education Department Assessments web app is installed.

3. Select the **Device settings** tab. Scroll to **Enrollment and access** and select **Verified Mode**. Verified Mode ensures that only enrolled and trusted ChromeOS devices can run the ChromeOS PWA, and your testing environment remains secure and authenticated.

4. Set configuration to: Require verified mode boot for verified access.

Verified mode

About this setting
Specifies whether verified boot mode is required for enrolled devices.

Choose from:

- **Require verified mode boot for verified access**—Devices must be running in verified boot mode for device verification to succeed. Devices in Dev mode will always fail the verified access check.
- Skip boot mode check for verified access—Allows devices in Dev mode to pass the verified access check. [Show more](#)

Inheritance: Locally applied

Configuration: **Require verified mode boot for verified access**

Related settings:
[Verified Mode](#)
By default, Skip boot mode check for Verified Access is selected,...

[Verified access](#)
Controls whether web services can verify that a device is running...

5. Under **Services with full access**, add the verified access service account listed below and then select **Save**:

emetric-verify-access-api@civil-glyph-433121-j9.iam.gserviceaccount.com

Verified mode

About this setting
Specifies whether verified boot mode is required for enrolled devices.

Choose from:

- **Require verified mode boot for verified access**—Devices must be running in verified boot mode for device verification to succeed. Devices in Dev mode will always fail the verified access check.
- Skip boot mode check for verified access—Allows devices in Dev mode to pass the verified access check. [Show more](#)

Inheritance: Locally applied

Configuration: **Require verified mode boot for verified access**

Services with full access
emetric-verify-access-api@civil-glyph-433121-j9.iam.gserviceaccount.com

Service accounts which are allowed to receive device ID. Put one pattern on each line.

Services with limited access

Save Cancel

Note: Pay close attention when entering the service account, as any typos or added characters will prevent the app from entering kiosk mode.

6. Scroll to the **User Data** section under **Sign-In Settings**.

The screenshot shows the Google Admin console interface. On the left, the 'Settings' sidebar is visible with a search bar and a list of organizational units including 'emetric.net'. The main content area is titled 'Settings' and has tabs for 'User & browser settings', 'Device settings' (highlighted with a red box), and 'Managed guest session settings'. Under 'Sign-in settings', a table lists various settings. The 'User data' row is highlighted with a red box, showing the configuration 'Do not erase local user data' and 'Locally applied' inheritance. A red arrow points to the 'User data' row.

Setting	Configuration	Inheritance	Supported on
Device restriction schedule	No entries	Google default	Android, iOS
Device wallpaper image		Locally applied	Android, iOS
User data	Do not erase local user data	Locally applied	Android, iOS
Single sign-on IDP redirection	Take users to the default Google sign-in screen	Locally applied	Android, iOS
Single sign-on cookie behavior	Disable transfer of SAML SSO Cookies into user	Locally applied	Android, iOS

7. Verify that **Do not erase all local data** is set, if not, click on **User Data** to update the setting with the drop-down menu and click **Save**.

The screenshot shows the 'User data' settings page. The left sidebar shows the organizational unit 'emetric.net'. The main content area has a tab for 'User data'. Below the tab, there is a section 'About this setting' explaining that it controls whether ChromeOS devices delete user data and local settings on user sign-out. The 'Configuration' section shows a dropdown menu set to 'Do not erase local user data', which is highlighted with a red box. The 'Inheritance' section shows 'Locally applied'. At the bottom, there is a 'Save' button (highlighted with a red box) and a 'Cancel' button. A 'Related settings' section on the right lists 'Chrome Sync' and 'Local storage'.

User data

About this setting

Controls whether ChromeOS devices delete user data and local settings on user sign-out.

Data the device synchronizes persists in the cloud but not on the device itself. If you set it to **Erase all local user data**, the storage available to the users is limited to half the RAM capacity of the device. If the policy is set together with a managed guest session, it won't cache the session name or avatar.

Note: By default, ChromeOS devices encrypt all user data. [Show more](#) to learn how to clean up.

Inheritance

Locally applied

Configuration

Erase all local user info, settings, and state after each sign-out

Do not erase local user data

Save Cancel

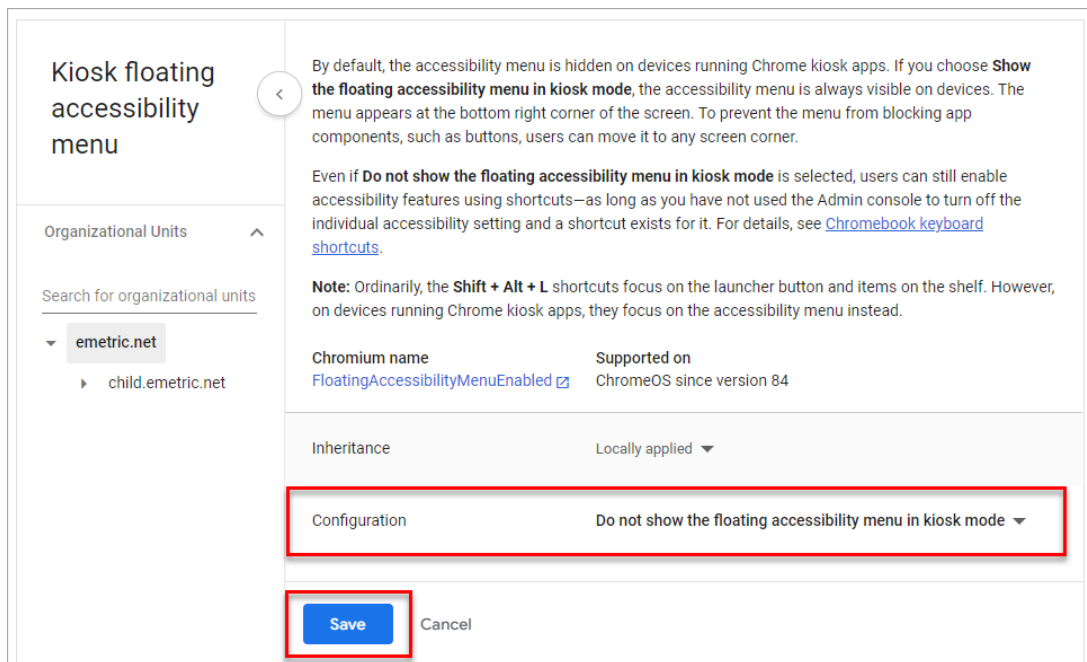

Note: This setting is crucial to allow Chrome local storage to be used to store student responses if network connectivity is lost. If this is not configured, student responses will not be saved to the device in the case of internet disruptions.

8. Scroll to the Kiosk Floating Accessibility Menu in the Kiosk Accessibility section.

9. Verify that **Do not show the floating accessibility menu in kiosk mode** is set; if not, click on **Kiosk Floating Accessibility Menu** to update the setting with the drop-down menu and click **Save**.

10. Scroll to Kiosk select to speak in the Kiosk Accessibility section.

The screenshot shows the Chrome Settings page for a device. The left sidebar contains a 'Settings' menu with options like 'Devices', 'Groups', and 'Organizational Units'. The main content area is titled 'Device settings' and shows a list of settings under the 'Kiosk accessibility' section. The 'Kiosk select to speak' setting is highlighted with a red box, and a red arrow points to it. The setting is currently set to 'Disable select to speak' and is 'Locally applied'.

Setting	Configuration	Inheritance	Supported on
Kiosk floating accessibility menu	Do not show the floating accessibility menu in kiosk mode	Locally applied	ChromeOS, Android, iOS
Kiosk spoken feedback	Allow the user to decide	Google default	ChromeOS, Android, iOS
Kiosk select to speak	Disable select to speak	Locally applied	ChromeOS, Android, iOS
Kiosk high contrast	Allow the user to decide	Google default	ChromeOS, Android, iOS
Kiosk sticky keys	Allow the user to decide	Google default	ChromeOS, Android, iOS

11. Verify that **Disable select to speak** is set; if not, click on **Kiosk select to speak** to update the setting with the drop-down menu and click **Save**.

The screenshot shows the 'Kiosk select to speak' settings page. The left sidebar contains a 'Settings' menu with options like 'Devices', 'Groups', and 'Organizational Units'. The main content area shows the 'About this setting' section, which explains that this setting specifies whether users can select items on the screen to hear specific text read aloud. Below this, the 'Configuration' dropdown is set to 'Disable select to speak' and is highlighted with a red box. The 'Save' button is also highlighted with a red box.

Kiosk select to speak

About this setting

Specifies whether users can select items on the screen to hear specific text read aloud. While ChromeOS reads the selected words aloud, each word is highlighted visually. For details, see [Hear text read aloud](#).

Chromium name: [SelectToSpeakEnabled](#)

Supported on: ChromeOS since version 77

Inheritance: Locally applied

Configuration: **Disable select to speak**

Save Cancel

12. Scroll to Kiosk dictation in the Kiosk Accessibility section.

The screenshot shows the Google Admin console interface. On the left, the 'Settings' sidebar is visible with a search bar and a list of organizational units including 'emetric.net' and 'child.emetric.net'. The main content area is titled 'Kiosk accessibility' and contains a table of settings. The table has columns for 'Setting', 'Configuration', 'Inheritance', and 'Supported on'. The 'Kiosk dictation' row is highlighted with a red box, and a red arrow points to it from the left sidebar.

Setting	Configuration	Inheritance	Supported on
Kiosk sticky keys	Allow the user to decide	Google default	Android, iOS
Kiosk on-screen keyboard	Allow the user to decide	Google default	Android, iOS
Kiosk dictation	Disable dictation	Locally applied	Android, iOS
Kiosk keyboard focus highlighting	Allow the user to decide	Google default	Android, iOS
Kiosk caret highlight	Allow the user to decide	Google default	Android, iOS

13. Verify that **Disable dictation** is set; if not, click on **Kiosk dictation** to update the setting with the drop-down menu and click **Save**.

The screenshot shows the 'Kiosk dictation' settings page. The left sidebar is the same as in the previous screenshot. The main content area shows the 'About this setting' section, which explains that this setting specifies whether users can enter text using their voice instead of a keyboard. Below this, the 'Configuration' section shows a dropdown menu set to 'Disable dictation', which is highlighted with a red box. At the bottom of the page, the 'Save' button is highlighted with a red box, and a 'Cancel' button is also visible.

Note: Students with accommodations that are embedded within the New Mexico Public Education Department Assessments Student Kiosk, including text-to-speech, will access these accommodations directly through the New Mexico Public Education Department Assessments Student Kiosk. ChromeOS contains native accessibility features that may appear within the kiosk with a floating menu. Technology Coordinators should disable these accessibility features in Google Admin before testing occurs to avoid issues.

Note: To avoid students inadvertently entering guest sessions, we recommend disabling managed guest sessions on OUs used for testing. To disable, on the Settings page select the **Managed guest session settings** tab and then select **Managed guest session**. Ensure that Managed guest session is set to **Do not allow managed guest sessions** and click **Save**.

When these steps are completed, the New Mexico Public Education Department Assessments Web App Kiosk will appear on all Chromebook devices that are in your domain.

Important Note: Students should not log into Chromebooks™ to take an operational test. When the Chromebooks™ are turned on, simply click the **Apps** link in the bottom row and select the **New Mexico Public Education Department Assessment** app. The kiosk will open in full-screen mode.

For more information, see the following links:

- [Use Chromebooks™ for Student Assessments](#)
Important Note: Read “Scenario 1: School sets up Chromebook™ to run as a Single App Kiosk running the exam app.” Do not follow the instructions for Scenarios 2 and 3.
- [Manage Device Settings](#), which provides general information for managed Chromebooks.

When you are ready to conduct Site Readiness for this configuration, see section IV: [Site Readiness Testing and Site Certification](#).

B. iPadOS Application Installation

If the iTester app was installed on your devices from previous years, the app will need to be updated. Follow the steps below to update the iTester app if automatic updates are not enabled on the iPad.

1. Open the **App Store** on the iPad.
2. Tap your **Apple ID icon** or your profile picture in the top right corner.
3. Scroll down to see pending updates.
4. Tap **Update** next to the iTester app.

Follow the steps below to install the iTester application on your testing devices.

Step 1: Set up your school testing environment

Review section II: [Technology Setup](#) in detail.

Step 2: Download the iTester App from the Apple App Store

The iTester iPad application is a Single Instance application. IT Coordinators will select New Mexico during the initial setup of the app. If you do not already have the iTester app on your iPad, download it from the Apple App Store following the steps below.

1. Open the **App Store** on the iPad.

2. Search for **iTester**.
3. When you locate the iTester app, click **Get** to download it to the iPad.

4. Launch the iTester app.
5. Choose **New Mexico** from the drop-down menu and then click **Go**. You will be directed to the student sign in screen for the New Mexico Kiosk.

Note: If you select the wrong program in the **Choose your location** drop-down menu, select **Change Location** on the iTester login page.

When you are ready to complete Site Readiness for this configuration, see section IV: [Site Readiness Testing and Site Certification](#).

Configure iPad for control with external keyboard

To configure iPads for full kiosk control using an external keyboard, follow these steps:

1. Open the **Settings app**.
2. Tap **Accessibility** on the left-side menu.
3. Select **Keyboards & Typing**.
4. Tap **Full Keyboard Access**.
5. Toggle the switch to **On**.

Automatic Assessment Configuration

A feature in iPadOS called Assessment Mode (AM) (formerly known as Automatic Assessment Configuration [AAC]) works with iTester to lock down an iPad for online testing. Technology coordinators do not need to do anything to set up AM. When a student launches the iTester App and logs in to a test, and then logs in to a test session, AM will automatically prompt the user to enter single app mode.

This action disables features such as auto correction, define, spell check, predictive keyboard and some keyboard shortcuts. For a complete list, visit this [Apple Support page](#).

This feature helps ensure a secure test environment without requiring technology coordinators to use Mobile Device Manager Software or manually turn on guided access and change keyboard settings. AM is the preferred method of securing the iTester App and should be used in place of guided access. If guided access is on, it will override AM; therefore, guided access should be turned off to allow AM to function. No additional setup is necessary to enable AM.

C. Mac OS

Follow the steps below to install the kiosk on all student testing running macOS. The macOS kiosk is updated each year. If your devices have a previous version of the New Mexico Public Education Department Assessments Student Kiosk, the new kiosk can be installed on top of the old version by following the instructions below.

Step 1: Set up your school technology

Review section II: [Technology Setup](#) in detail.

Step 2: Download the New Mexico Public Education Department Assessments Kiosk

1. Go to the New Mexico Public Education Department Assessments Portal and log in with your username and password. If you need assistance logging in to the portal, contact your school or district test coordinator.
2. On the portal home page, click **Administration**.
3. On the Administration home page, click **Student Kiosk for Mac**. The kiosk will download to the device.

Step 3: Install the downloaded Kiosk

Upon completion of the download process:

1. Navigate to the file location you specified during the File Save process.
2. The package will run a program to determine if the software can be installed. Click **Allow**.

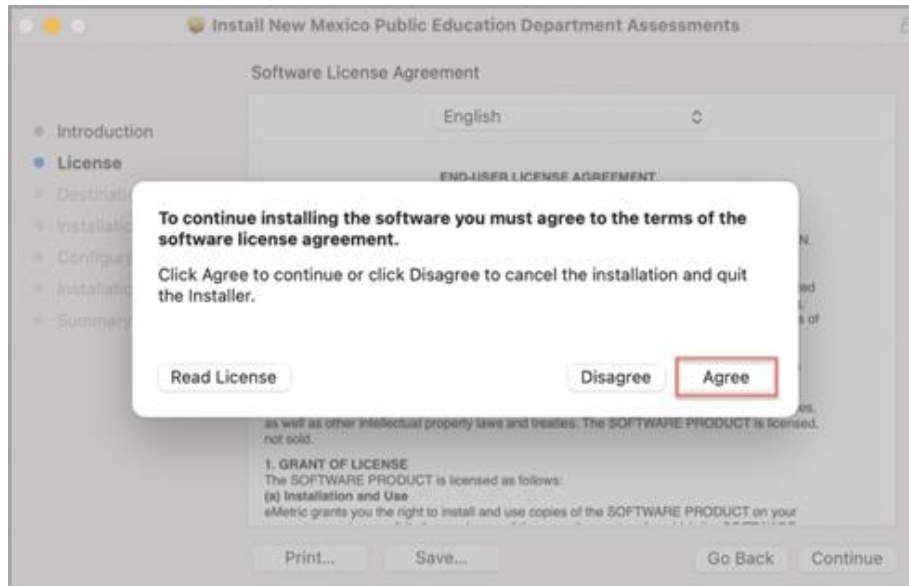

3. Read the instructions and click **Continue**.

4. Read the Software License Agreement and then click **Continue** and then **Agree**.

5. Indicate where you would like to store student responses.

Important: In the event the student loses internet connectivity during testing, responses will be stored to this location. Additionally, this folder must have the appropriate read/write permissions to allow test takers to write data to this location.

Choose from the following two options:

- **User's Home Directory:**

During kiosk installation, if you choose the default option to store the stored response files in the user profile, these files will have names similar to the format below:

~ /Library/Application Support/eMetric/New Mexico Public Education Department Assessments/Storage/iTesterSync_AD849G-DA56-19F3-73K39823DJS3

- **Custom location:**

If you select **Save in the following directory**, you must manually enter the alternate path.

For more information on selecting a location for stored responses or retrieving stored responses, contact Cognia Technical Support at nmtechsupport@cognia.org or (866) 629-0220.

6. Then click **Continue**.

7. Verify installation type and click **Install**. You may be required to enter your admin password.

8. When the installation is complete, click **Close**.

9. For enhanced security measures, grant the testing application access to **Desktop Folder**. To grant access follow the path below:

Click System Settings > Privacy and Security > Files and Folder > New Mexico Public Education Department Assessments > Desktop Folder (Turn on Toggle).

10. After launching the kiosk for the first time, you may be prompted:

"Following permission are not granted: Camera, Audio, Desktop Folder"

Select Validate Permission.

- 11.** If you are using a newer system running MacOS 15.0 or greater with an M2 processor chip you will need to install Rosetta. This can be accomplished by launching the New Mexico Public Education Department Assessments Kiosk for the first time.

After launching the kiosk, you will be prompted:

To open “New Mexico Public Education Department Assessments,” you need to install Rosetta. Do you want to install it now?

Select **Install**.

Note: Rosetta enables Intel-based features to run on Apple silicon Macs. Reopening applications after installation is required to start using Rosetta.

- 12.** Force Click will need to be disabled for MacBooks with Force Touch trackpads. By disabling Force Click, the trackpad will function as normal and will only disable the secondary press features, not disable the trackpad itself. To disable, follow the path below:

Click System Settings > Trackpad > Point & Click > Force Click and haptic feedback (Turn off Toggle).

Note: This setting will only be available if the MacBook has a Force Touch trackpad.

When you are ready to complete Site Readiness for this configuration, see section IV: [Site Readiness Testing and Site Certification](#).

Note: Students should avoid using **Command (⌘) + Q** to exit the application. Using this shortcut to exit the application can sometimes trigger an unexpected error. This is a system-wide feature and not specific to our application. Instead, always use the in-app Exit button or logout options provided in the interface.

D. Windows OS

New for the 2026-27 school year, there are two distinct installation options for the Windows kiosk. Both options deliver identical application features, security protocols, and student testing experiences. The preferred installation method depends entirely on your organization's deployment and management preferences.

Installation Options

- **Microsoft Store App** - This method delivers updates automatically in the background through the Microsoft Store, reducing the need for manual software maintenance.
- **Portal Download** – This method grant's full control over the application's local write locations and updates will be performed manually via new kiosk download.

Technology Coordinators may select either option based on the approach that best supports their device management and deployment practices.

iTester Windows App Installation

The iTester Windows application is a Single Instance application. IT Coordinators will select New Mexico during the initial setup of the app. Follow the steps below to install the iTester Windows application on your testing devices.

To enable automatic updates, see: <https://support.microsoft.com/en-us/windows/apps/turn-on-automatic-app-updates>

Step 1: Set up your school technology

Review section II: [Technology Setup](#) in detail.

Step 2: Download the iTester App from the Microsoft Store

1. Open the Microsoft Store app on the Windows device.
---Screenshot---
2. Search for **iTester**.
3. When you locate the iTester app, click **Get** to download it to the Windows device.
---Screenshot---
4. Launch the iTester app.
5. Choose **New Mexico** from the drop-down menu and click **Go**. You will be directed to the student sign in screen for the New Mexico Public Education Department Assessments Kiosk.
---Screenshot---

Note: If you select the wrong location in the **Choose your location** drop-down menu, select **Change Location** on the iTester login page.

---Screenshot---

6. For Windows devices with touchpads Four-finger gestures for swiping will need to be disabled. To disable go to **Settings > Bluetooth & devices > Touchpad**. Then locate Four-finger gestures and expand the section. Next, change the drop-down menu for Swipes to **Nothing**.

iTester Windows App Scripted Installation

Technology coordinators using scripted or automated deployments can install the iTester Windows app by running the following command:

- `winget install --id eMetricLLC.iTester`

The command downloads and installs the iTester Windows App on the device.

iTester Windows App Installation via Intune

Technology coordinators can use Microsoft Intune to distribute and manage the iTester Windows App across all managed client devices. Follow the step-by-step instructions described here:

<https://learn.microsoft.com/en-us/intune/app-management/deployment/add-microsoft-store>

Legacy Windows Kiosk Installation

The legacy Windows kiosk required a full uninstallation of all older versions before installing the new kiosk. Follow these steps to prepare and update your testing devices.

Step 1: Set up your school technology

Review section II: [Technology Setup](#) in detail.

Step 2: Remove the previous version of the New Mexico Public Education Department Assessments Kiosk.

1. Open the **Control Panel** on the Windows device.
2. Select **Programs and Features** (or **Add or Remove Programs**).
3. Locate **New Mexico Public Education Department Assessments Kiosk**.
4. Click **Uninstall** and complete the removal wizard.
5. Restart the device to complete the uninstallation.

Step 3: Download the New Mexico Public Education Department Assessments Kiosk

1. Go to the [New Mexico Public Education Department Assessments Portal](#) and log in with your username and password. If you need assistance logging in to the portal, contact your school or district test coordinator.
2. On the portal home page, click **Administration**.
3. Click **Student Kiosk for Windows** to download the New Mexico Public Education Department Assessments Kiosk to the device.

Step 4: Install the downloaded Kiosk

The New Mexico Public Education Department Assessments Kiosk for Windows can be installed on the school network or on each individual student testing device. It is recommended that the kiosk is installed on each individual device to avoid network connection issues. For installing on each individual student testing device follow the steps below or follow the steps for [Windows MSI Package Scripted Installation](#), or follow the steps for [Windows MSI Package Installation Via Group Policy](#).

1. Click the installation file in the **Downloads** folder on the device. The **Setup Wizard** will open. Read the instructions and then click **Next** to continue.

2. Read the End-User License Agreement and check the **I accept the terms in the License Agreement** check box. Click **Next** to continue.

3. Use the default folder location for installation or click **Change** and type a different installation location in the space provided. Then click **Next** to continue.

Note: You can choose to install the kiosk in a shared network folder or a local folder on the student testing device. It is recommended that the kiosk is installed on the individual student testing device instead of a network installation to avoid network connection issues (see section II, part A: [Network Connectivity](#)).

4. Select the directory to store student responses.

Important: In the event the student loses internet connectivity during testing, responses will be stored to this location. Additionally, this folder must have the appropriate permissions to allow test takers to write data.

Choose from the following two options, then click **Next**:

- **Use the User Profile directory for response storage:**

During kiosk installation, if you choose the default option to store the stored response files in the user profile, these files will have names like this format:

- **Use a custom directory for response storage:**

If you select **Save in the following directory**, you must manually enter the alternate path.

5. After verifying the storage response location, click **Install**.

6. Click **Finish** to complete the installation.

7. For Windows devices with touchpads Four-finger gestures for swiping will need to be disabled. To disable go to **Settings > Bluetooth & devices > Touchpad**. Then locate Four-finger gestures and expand the section. Next, change the drop-down menu for Swipes to **Nothing**.

8. When you are ready to complete Site Readiness for this configuration, see section IV: [Site Readiness Testing and Site Certification](#).

Windows MSI Package Scripted Installation

Network administrators can install the New Mexico Public Education Department Assessments Kiosk via an installation script to be executed by an Admin account on the machine. The script can be written to run without any human interaction (quiet switch) and to install in the default directory (C:\Program Files) or any target directory of choice. Uninstalling the client can also be scripted.

Below are generic scripts that can be used for installation and uninstallation.

Script Examples

<Source> = Complete path to the New Mexico Public Education Department Assessments Kiosk MSI installation file, including .msi installation file name. Example:
C:\Downloads\NMPEDA.msi

<Target> = Complete path to the location where kiosk should be installed other than the default location (C:\Program Files). Example:
C:\NewMexicoPublicEducationDepartmentAssessments\Installation_Dir

<APPDATALOCATION> = Complete path to the location for storing the cache and encrypted student responses created due to network interruptions. Example: D:\Cache.

Note: Ensure that this location is excluded from system restore software, like Deep Freeze.

Installation Script

```
msiexec /i "<Source>" /quiet INSTALLDIR="<Target>"  
ITESTERAPPDATALOCATION="<APPDATALOCATION>" INSTALLLEVEL=2
```

Example: msiexec /i "C:\Downloads\NMPEDA.msi" /quiet
INSTALLDIR="C:\NewMexicoPublicEducationDepartmentAssessments"
ITESTERAPPDATALOCATION="D:\Cache" INSTALLLEVEL=2

Warning: If you do not specify ITESTERAPPDATALOCATION, then the Local Application Data folder located in the User Profile of the actively logged-in user will be used by default. If you do not specify INSTALLLEVEL=2, then the configuration required for setting the <APPDATALOCATION> will not be created.

Uninstallation Script

```
msiexec /x "<Source>" /quiet
```

Example: msiexec /x "C:\Downloads\NMPEDA.msi" /quiet

Windows MSI Package Installation Via Group Policy

Network administrators can use Microsoft Active Directory Group Policy to distribute the New Mexico Public Education Department Assessments Kiosk MSI package to all client computers.

Follow the step-by-step instructions described in Microsoft's [Knowledge Base article](#).

Note: Default installation locations will be used when using Group Policy to distribute the New Mexico Public Education Department Assessments Kiosk. This option will also not allow systematically specifying a network location for caching and storing encrypted student responses created due to network interruptions. The local Application Data folder located in the User Profile of the actively logged-in user will be used by default.

Windows Network Kiosk Installation

To install the New Mexico Public Education Department Assessments Kiosk on a school network:

1. Complete the local kiosk installation listed above on the machine that will host the application.
2. Configure the stored response location to network share or leave as default during installation.
3. On the student testing devices, create a shortcut to the application on the network. The shortcut created should be pointed to NMPEDA.exe.
4. Ensure that users have read/write/modify access to stored response directory configured in Step 2.

IV. Site Readiness Testing and Site Certification

A. Purpose

The New Mexico Public Education Department Assessments Portal includes a Site Readiness tool for schools and districts to assess their readiness for online testing via the New Mexico Public Education Department Assessments Kiosk and to identify any potential technology-related issues before testing begins to ensure a smooth testing experience. The Site Readiness tool is used to verify that testing devices meet the minimum requirements and have been properly configured.

The Site Readiness tool includes the **System Set-Up Test** and the **Student Interface Test**.

- The **System Set-Up Test** tests bandwidth, connectivity, screen resolution, and the text-to-speech function.
- The **Student Interface Test** provides sample test questions to determine whether the device is capable of correctly displaying and navigating test content in the New Mexico Public Education Department Assessments Kiosk. The Student Interface Test also allows technology coordinators to test the student tools, including the Line Reader, Answer Eliminator, Text Highlighter, and Notepad, to confirm they are functioning properly.

To administer the Site Readiness test, the technology coordinator launches the New Mexico Public Education Department Assessments Kiosk on each device configuration (i.e., device type and operating system) being used for testing at that site and then uses the Site Readiness login for the assigned school to run the test. Then, the technology coordinator certifies the site (school) in the New Mexico Public Education Department Assessments Portal to indicate to the school and district test coordinators that the site's technology is ready for testing.

Note: The Site Readiness test must be conducted using the secure New Mexico Public Education Department Assessments Kiosk. The test does not need to be conducted on the browsers used for practice or interim tests.

B. Using the Site Readiness Tool

It is crucial that the Site Readiness tool is run on **every** device type or device configuration that will be used for testing. The results for each device tested will be captured and displayed on the Site Readiness Details page within the New Mexico Public Education Department Assessments Portal.

Note: Starting with iPadOS 13, Apple made a change with the user agent for iPadOS. Due to this change, iPads do not populate in the Site Readiness tab of the New Mexico Public Education Department Assessments Portal. If you are an iPad school or district, we recommend running the Site Readiness tool on a few iPads to ensure they pass the System Set-Up and Student Interface tests without issues and recommend an alternative method of communicating this information to test coordinators.

After reviewing the [Technology Guidelines](#) and installing the New Mexico Public Education Department Assessments Kiosk, follow the instructions below.

Step 1: Locate the Site Readiness credentials in the New Mexico Public Education Department Assessments Portal

1. Log in to the [New Mexico Public Education Department Assessments Portal](#) with your username and password

2. On the Portal home page, click **Administration**.

3. The Site Readiness account information appears at the bottom of the Administration home page.

Welcome to the New Mexico Public Education Department Assessments Administration portal. This site provides access to student information and test session details.

Based on device configurations at your facility, you or your IT coordinator need to download and install the appropriate student kiosk utilizing the links in the table below. Apps for iPads and Chromebooks will need to be downloaded from the appropriate app store.

Windows	Student Windows Installer
Mac	Student Mac Installer

Click [here](#) for access to downloadable PDFs of formative item sets.

If you need assistance utilizing this site, please contact Cognia support at nmttechsupport@cognia.org or by calling toll-free (877) 676-6722.

Proctor password for

Emetric1

Site Readiness login for

Username: WSR-998
Password: CZWJPC45

4. Make a note of the username and password for the school, which you will use to log in to the New Mexico Public Education Department Assessments Kiosk.

Step 2: Conduct Site Readiness on every device configuration

1. Launch the New Mexico Public Education Department Assessments Kiosk on the device.
2. Log in to the New Mexico Public Education Department Assessments Kiosk with the Site Readiness username and password provided for the school (shown above).

Important Note: Use the Site Readiness login credentials exclusively for the school only, and do not use the credentials for any other purposes. Do not use the Site Readiness credentials for any other school.

The image shows a web page for the New Mexico Public Education Department Assessments. At the top, there is a logo for NMPED (New Mexico Public Education Department) featuring a hot air balloon. Below the logo, the text "NEW MEXICO" is displayed in large, bold, black letters. Underneath, "Public Education Department Assessments" is written in a smaller, bold, black font. The main heading is "STUDENT SIGN IN" in a blue, sans-serif font. Below this, there are two input fields: "Username" and "Password". A green circular button with the text "Sign In" is positioned below the password field. At the bottom, there is a blue pencil icon followed by the text "Access the Practice Test".

3. Verify your school's name at the top of the page. Under **System Set-Up Test**, click **Check System Set-Up** to begin the test.

The image shows a web page titled "Hello, Workstation User". In the top right corner, there is a red button labeled "Exit" with the text "Not Workstation User?" next to it. The main heading is "Hello, Workstation User" in a large, blue, sans-serif font. Below this, there is a white box containing a form with the following fields:

6-432599 State Student ID	Date of Birth	Gender
Cyber City Sch1-998 School Name	Teacher	Grade

Below the form, the text "The following tests have been scheduled for you:" is displayed in a blue, sans-serif font. Underneath, there are two sections:

- System Set-Up Test**
Check System Set-Up
- Student Interface Test**
Check Student Interface

The screen resolution, host URL (newmexico.cognia.org), and operating system for the device are listed at the top of the System Set-Up Test page. The System Set-Up Test consists of four parts: the Connection Capacity Test, the Connectivity Check, the Screen resolution check, and the Text-to-Speech check. The results of each test appear as soon as it is completed.

The screenshot shows the 'System Set-Up Test' interface. At the top, it displays system information: 'Screen Resolution: 1920x1080', 'Host: newmexico.cognia.org', and 'Operating System: window 19.0.0'. Below this, there are four numbered steps:

- 1 Connection Capacity Test Results: 995 Simultaneous Test Downloads**
Your download speed is **66.39 Mbps**.
Based upon the current calculated download speed between your testing device and the data center, a maximum of **995** students may simultaneously log-in and download the test. If you plan to test more than **995** students during the same period of time, divide them into groups of no more than **995** students and stagger the groups' test log-in by 1-2 minutes.
- 2 Connectivity Check passed.**
All connectivity checks passed.
- 3 Screen resolution passed.**
Current screen resolution is at least 1024x768.
- 4 Text-to-Speech check has begun.**
Below this step is a blue button labeled 'Test Text-to-Speech'.
Below the button is the question 'Does Text-to-Speech work?' with two buttons: a green 'Yes' button and a grey 'No' button.

4. The **Connection Capacity Test** evaluates your site's capacity for simultaneous test downloads. It provides the current download speed between the testing device and the testing servers (data center), and, based on that speed, it provides the maximum number of students that may simultaneously log in and download a test session.

If you plan to test more students concurrently than the recommended number of simultaneous test downloads, it is recommended that you divide the students into groups no greater than the number of recommended simultaneous test downloads and stagger each group's test log in by 1–2 minutes. This will reduce the likelihood of interruption during sign-in.

5. The **Connectivity Check** is designed to ensure the testing device has access to both the kiosk's local storage folder, where student responses will be saved if the test device loses internet connectivity, and the testing servers.

- If the Connectivity Check fails with the following message:

“The connectivity check failed. Please check your read and write permissions to the storage folders and try again or contact Support for further assistance. Error Code: 6004 – StorageWriteFail”

This means that the New Mexico Public Education Department Assessments Kiosk does not have the proper permissions for the storage folder. The kiosk requires read, write, and modify permissions on Windows and Read & Write on Mac.

- If the test fails for any reason other than “Error Code:6004 - StorageWriteFail,” contact the Cognia Service Center.
6. The **Screen resolution test** will ensure that the testing device meets the required screen size and resolution for an optimal testing experience. If this test fails, adjust the screen resolution of the device.
 7. The **Text-to-Speech test** will ensure that this accommodation is operating as expected for students who have this accommodation. In the Text-to-Speech field, click **Test Text-to-Speech** to play a voice sample.

- If you can hear the voice sample, click **Yes**.
 - If you cannot hear the voice sample, click **No**, and fix your audio connection. You will need to verify that there is a voice package installed on your machine, that there is an audio playback device connected to the testing device (e.g., internal speakers, external speakers, headphones), the volume is not muted and is audible, and that the desired audio playback device is set as the default device.
8. When you are done, click **Return** to return to the Site Readiness page.

- If all the system checks are successful, you are ready to begin the next Site Readiness test.
 - If one or more system checks fail, adjust your configuration as needed and re-run the System Set-Up test.
9. When the System Set-Up test is completed, click the blue **Check Student Interface** button.

The screenshot shows a user interface for a 'Workstation User'. At the top right, there is a link 'Not Workstation User?' and a red 'Exit' button. The main heading is 'Hello, Workstation User'. Below this, a white box contains user information: '6-432599' (State Student ID), 'Date of Birth', 'Gender', 'Cyber City Sch1-998' (School Name), 'Teacher', and 'Grade'. Below the white box, it says 'The following tests have been scheduled for you:'. Under 'System Set-Up Test', there is a grey 'Check System Set-Up' button. Under 'Student Interface Test', there is a blue 'Check Student Interface' button.

10. Read the instructions on the page and then click **Continue**.

The screenshot shows a page titled 'Student Interface Test' with the subtitle 'Check Student Interface Directions'. The main text reads: 'You will now begin the Student Interface Test. Navigate through each item (there are four) and ensure the buttons, tools, accommodations, accessibility features and item response options are visible and can be used with the input device. You must complete this test to log this device in the New Mexico Assessment of Site Readiness Portal's Site Readiness Test log.' At the bottom center, there is a large blue circular button labeled 'Continue'.

11. Confirm that you can effectively respond to a few questions. Click on and try out a few student tools, such as the Notepad and Line Reader, to make sure you can use them. To activate a tool, click on the tool in the tool bar and use it in the test interface. On the constructed response question, ensure you can type in the response box.

Note: Certain tool, accommodations, and accessibility features will be available in the student kiosk for operational testing but will not be available in the Site Readiness tests.

12. On the last test question page, click **Finish**.

13. On the Test Review page, click **Turn In** to submit your test.

You have completed: 4 out of 4 question(s).

1 answered 2 answered 3 answered
4 answered

Return to test Turn In

14. To confirm, click **Turn In** again. You should return to the Site Readiness page where the test session is grayed out.

15. To exit the Site Readiness tool, click **Exit** in the top right corner of the page.

Not Workstation User? Exit

Hello, Workstation User

The following tests have been scheduled for you:

System Set-Up Test

Check System Set-Up

Student Interface Test

Check Student Interface

16. To close the New Mexico Public Education Department Assessments Kiosk, click **Exit** at the bottom right corner of the student sign-in page.

If you have questions about the Site Readiness tool, contact the Cognia Service Center.

C. Site Certification

After all device configurations for your school have successfully completed Site Readiness, the technology coordinator will certify the site for testing.

1. Log in to the New Mexico Public Education Department Assessments Portal with your username and password.
2. Click Administration.
3. Click **Site Readiness** at the top of the page.

4. On the Site Readiness page, locate the school to be certified, and then click **View Details**.

Showing 1 - 1 of 1				
*Date and time is in Mountain Standard Time.				

District and school test coordinators can also view when the site was certified and who certified the site on the Site Readiness tab without having to click into the Site Readiness Details.

This certification indicates to the district or school test coordinator that the technology coordinator has tested the devices at the site and ensured they are operating as expected and meet the technology requirements, acknowledging that the site is ready for testing. Once complete, technology coordinators should inform their school test coordinators.
